Smooth 1.5" x 1.5" Ultra-Lite Extrusion Profile

Faztek now offers a smooth version of its very popular 1.5" x 1.5" Ultra-lite extrusion profile. As with the original Ultra-lite material, you can benefit from the cost savings and light weight of this profile.

Part No.
15QE1515UL

- ▶ Nearly 15% lighter than the standard 1.5" x 1.5" Lite extrusion
- ▶ 17% less expensive than the standard 1.5" x 1.5" Lite extrusion.

This new smooth T-slotted extrusion profile is ideal for light-weight applications where cost is an issue and maximum strength is not necessarily a top priority. Some ideal applications may include machine guarding, enclosures, small partitions and door frames.
